SUMMARY

A product manager focused on 0→1 product building and applied AI—solving problems by integrating AI rather than staying inside a single function. Combining strategic thinking with technical fluency, I define core problems, design scalable product architectures, and drive delivery with a data- and efficiency-first mindset. Focused on AI automation, decision optimization, and user-behavior design.

SKILLS

Product Strategy & Planning: 0→1 product design & execution, Product design, Figma, Product roadmap planning, Task management, Cross-functional collaboration

Data-Driven Decisions: Conversion-funnel analysis, A/B testing design, Data integration & analysis

AI Product Design: AI architecture planning, Automation design

Technical Fluency: API architecture, Front/back-end collaboration, Technical decision-making

Certifications: AWS Certified Cloud Practitioner, Google AI, TOEIC Gold

EXPERIENCE

Product Builder — CMoney

2025 — Present

AI product strategy | Automation | Fintech product optimization

- **Shipped high-impact projects solo with Vibe Coding:** No engineering resources required—proactively delivering initiatives the team long wanted but could never fit into the roadmap; validated across two flagship authors with 3,100+ purchases and 940 net-new customers, then codified into an SOP that lets 4+ marketers/PMs ship independently in 1 day—1 week.
 - **Finance-KOL Brand-Entry Landing Page:** Built brand-entry course landing pages for two top finance KOLs: ~180K visits → 3,100+ purchases (14–18% sign-up conversion), driving ~NT\$186M in combined revenue; praised by the authors as having 'no AI feel.'
 - **Stock-Picking Product (Web):** Rebuilt legacy desktop stock-picking products as web apps (futures in 3 weeks, long-term in 5); 50% fewer failures and 2x DAU; skill-ified the process to help 4 more PC→Web projects ship.
- **Investment App 0→1 planning & delivery:** Led 0→1 core feature design for a stock App—full specs plus Figma flows and high-fidelity prototypes; pairing AI prototyping with two RDs, compressed iteration cycles from 1–2 weeks to 0.5–2 days. First-half revenue NT\$18.1M, 96% monthly retention (top-3 among author apps), 75% active-paying, and WAU ~3x in two months (644 → ~2,000); redesigned list-style stock fields into card-based filtering for older users, reaching 33% adoption.
- **Accelerated company workflows with AI SaaS & automation:** Mapped company workflows to pinpoint AI-accelerable nodes; within two months automated 40% of repetitive work across marketing, engineering, and product (efficiency +85%); built agents such as a community-manager Agent that saves teams 20–50 hours per month.
 - **Data-analytics automation:** Built a cross-platform data-integration layer (GA, Mixpanel, App Store, etc.) that auto-generates insights, keeping the team on top of 30+ products in real time.
 - **AI video & content generation:** Designed an automated pipeline (persona model → script → subtitles → short-form video), a scalable content-production mechanism that sharply cut manual shooting and editing costs.

- **MediaPost auto-publishing tool:** Auto-ingest content → generate 3–5 posts → one-click publish, saving marketers ~70% of posting time; already in use for author community operations.
- **Led company-wide AI transformation & enablement:** Under the firm's Agent-development initiative, built 10+ company-service skills and provided AI consulting, enabling 10+ non-engineer PMs/marketers to ship services; packaged fundamentals (CM Deploy, deployment, databases) into skills and docs so teams grasp the underlying architecture, not just the tooling.

SELECTED PROJECTS

GenInk — Human-AI Co-Creation Tool

2026

- Not AI replacing creativity but augmenting it—drawing on a national top-screenplay-award background to solve the high cost of rewriting long-form work whenever character settings change.

Web: <https://gen-ink.vercel.app/>

GobetGoal — Duolingo for Weight Loss

2025

- Tackled the boredom that makes weight-loss hard to sustain by using the Octalysis framework to drive intrinsic motivation and designing a gamified level system; led a 4-person team to ship 0→1 in two months with strong beta-user praise.

EDUCATION

Hexschool Rocket Team — PM coordinating 0→1 development while personally building UI and front-end; shared knowledge at meetups. A cross-disciplinary collaborator, highly recommended by mentors.

2025

National Taiwan University of Arts — B.A. in Film & Television | Ranked #1 in department

2019 — 2023
