SUMMARY

A product manager focused on 0→1 product building and applied AI—solving problems by integrating AI rather than staying inside a single function. Combining strategic thinking with technical fluency, I define core problems, design scalable product architectures, and drive delivery with a data- and efficiency-first mindset. Focused on AI automation, decision optimization, and user-behavior design.

SKILLS

Product Strategy & Planning: 0→1 product design & execution, Product design, Figma, Product roadmap planning, Task management, Cross-functional collaboration

Data-Driven Decisions: Conversion-funnel analysis, A/B testing design, Data integration & analysis

AI Product Design: AI architecture planning, Automation design

Technical Fluency: API architecture, Front/back-end collaboration, Technical decision-making

Certifications: AWS Certified Cloud Practitioner, Google AI, TOEIC Gold

EXPERIENCE

Product Builder — CMoney

2025 — Present

AI product strategy / Automation / Fintech product optimization

- **Shipped high-impact projects solo with Vibe Coding:** No engineering resources required—proactively delivering initiatives the team long wanted but could never fit into the dev roadmap.
 - **Finance-KOL Landing Page:** Built course landing pages for multiple finance KOLs; #1 in organic search, 55% purchase-conversion rate.
 - **Stock-Picking Product (Web):** Rebuilt a legacy desktop product as a web app with enhanced features; 50% fewer failures, 2× DAU.
- **Fintech product 0→1 planning & delivery:** Led core feature design for a stock app; wrote full specs and produced Figma flowcharts and high-fidelity UI, delivering spec and prototype within one week; re-architected information structure and filtering logic, collapsing multi-level clicks into single-page filtering to speed up market-watching and stock selection.
- **Accelerated company workflows with AI SaaS & automation:** Mapped company workflows and pinpointed AI-accelerable nodes; within two months automated 40% of repetitive work across marketing, engineering, and product, improving efficiency by 85%.
 - **Data-analytics automation:** Built a cross-platform data-integration layer (GA, Mixpanel, App Store, etc.) to fix scattered, unattributed metrics; auto-generated insights keep the team on top of 30+ products in real time.
 - **AI video & content generation:** Designed an automated pipeline (persona model → script → subtitles → short-form video), creating a scalable content-production mechanism that sharply cut manual shooting and editing costs.
- **Led company-wide AI transformation:** To address scattered requirement docs that non-engineers struggled to implement, built 10+ company-service skills under the firm's Agent-development initiative and provided AI consulting, enabling 10+ non-engineer PMs to ship working services.

SELECTED PROJECTS

GenInk — Human-AI Co-Creation Tool

2026

- Not AI replacing creativity but augmenting it—drawing on a national top-screenplay-award background to solve the high cost of rewriting long-form work whenever character settings change.

[Web](#)

GobetGoal — Duolingo for Weight Loss

2025

- Tackled the boredom that makes weight-loss hard to sustain by using the Octalysis framework to drive intrinsic motivation and designing a gamified level system; led a 4-person team to ship 0→1 in two months with strong beta-user praise.

EDUCATION

Hexschool Rocket Team — PM coordinating 0→1 development while personally building UI and front-end; shared knowledge at meetups. A cross-disciplinary collaborator, highly recommended by mentors.

2025

National Taiwan University of Arts — B.A. in Film & Television | Ranked #1 in department 2019 — 2023
