

Sunny Chen

Product Builder — Product Manager × Full-Stack × Design

Taipei, Taiwan · yishuan522@gmail.com · 0978-649-787

[portfolio](#) · [github](#) · [linkedin](#)

SUMMARY

Product Builder operating at the intersection of product management, UI/UX, and full-stack development, turning AI concepts into shipped products and owning measurable outcomes. Delivered two AI-product MVPs solo within my first 30 days; as the sole PM leading a 3-person team, shipped an investment app 0→1 on iOS/Android, driving NT\$3M revenue and 1,000 WAU, and introduced spec-driven development with AI prototyping to compress requirements-to-delivery to 2 weeks, codified as the company's AI development SOP. A filmmaking background lets me build FFmpeg-based media pipelines, merging storytelling with technical execution.

SKILLS

Product: Product strategy & scoping, PRD & requirement breakdown, User stories & MVP prioritization, Competitive & market analysis, Metrics / North Star, A/B testing, Spec-driven development (SDD), User research & usability testing, Cross-functional collaboration (Jira / Notion / Confluence)

AI: AI prototyping workflow, Gemini, Cursor, AI development SOP design

Frontend: React, Next.js, TypeScript, TailwindCSS, Redux, TanStack Query, i18n, GSAP, SEO

Design: Figma, Photoshop, Illustrator, UI/UX, Information architecture

Data & Backend: Supabase, MongoDB, RESTful API, Playwright (E2E)

EXPERIENCE

Product Builder (RD / PM) — CMoney

2025/11 — Present

- End-to-end product ownership across product management, UI/UX, and full-stack development—turning AI concepts into shipped products.
- Architected and delivered two AI-product MVPs solo within the first 30 days, from database schema design to front-end implementation.
- As the sole PM leading a 3-person team, shipped an investment app 0→1 on iOS / Android (NT\$3M revenue, 1,000 WAU); introduced spec-driven development with AI prototyping to compress requirements-to-delivery to 2 weeks, later codified as the company's AI development SOP.
- Delivered a financial-product landing page solo in 1 day (55% conversion, 2,000 sign-ups, #1 SEO); lifted a finance-content commerce site's cart conversion from 22% to 57% (+159%).
- Built FFmpeg-based backend video pipelines (automated subtitle burning, encoding), merging a filmmaking background with technical execution.
- Stack: React / Vue, Supabase, and generative AI APIs (video / voice) to build scalable, user-centric AI tools; bridged technical feasibility and business goals through rapid internal testing and real-time iteration.

Multimedia / Motion Designer — BTSE (Crypto Exchange)

2024/07 — 2024/10

- Partnered with the product team on feature and product-marketing planning, translating product value into accessible content.
- Led content strategy on emerging platforms (RED, TikTok), iterating with user-behavior data.
- A single campaign video reached 196.1K views, ~100K above the channel average.

Project Planner (Film) — WeGoViral Studio

2022/10 — Present

- Owned project planning: produced proposals covering market positioning, competitive analysis, timeline, and budget; ran 500+ survey responses to build audience insight.
- Pitches won Ministry of Culture screenplay grants, the Ministry's top screenplay prize (NT\$1.2M), and a PTS incubation slot—over NT\$8M in funding.

Head of Video — Knowhow College (Top-100 Podcast)

2021/09 — 2022/12

- Led a 5-person video team across 50+ production projects, surpassing 1M downloads.
- Partnered cross-functionally with marketing and planning to build content-production SOPs and quality standards, raising output efficiency.

Editor / Film Production — Freelance

2019/10 — 2024/10

- Built brand identity systems and visual guidelines 0→1 for startups and film brands; led multiple pitch competitions, shortlisted in the Dagang Design and Chinese Design Awards.
- Film work shortlisted at multiple festivals (Best Director / Editing at the Yimei Awards, Best Documentary at the Shih Hsin 2-3 Festival, etc.).

SELECTED PROJECTS

Investment App (0→1, iOS/Android)

2026

- Sole PM, 3-person team, 0→1 on iOS/Android; NT\$3M revenue, 1,000 WAU; SDD + AI prototyping for 2-week delivery, codified as company AI SOP.

[App Store](#) · [Google Play](#)

Financial-Product Landing Page (1-day solo delivery)

2026

- 1-day solo 0→1 delivery; 55% conversion, 2,000 sign-ups; #1 SEO for target keywords (above corporate site).

[Web](#)

Finance-Content Commerce Site

2026

- Cart conversion 22%→57% (+159%); integrated YouTube live into a one-stop sales flow.

[Web](#)

AI Video & Content Generation (SaaS)

2025

- Designed an end-to-end pipeline (persona → script → subtitles → short video) integrating LLM / TTS / FFmpeg; cut per-video cost by 90% and shortened the production cycle from days to minutes.

[Web](#)

AI Data-Analytics Decision Tool (SaaS)

2025

- Productized SQL queries into an NLP interface; AI auto-summaries cut the decision path by 60%, lowering the barrier for non-technical users.

[Web](#)

Gamified Weight-Loss Platform

2025

- Led a 4-person team from concept to launch in 2 months; defined gamification retention metrics; praised as 'addictive like a game' at Demo Day.

[Web](#) · [GitHub](#)

Portfolio Website

2025

- Next.js multilingual site with animation and SEO, framed as a blind-box concept; landed an interview in an overseas recruiting process.
